

AI Solution for Shared Parking.

# What is the Parking Process Really Like ?

- Frustrating
- Confusing
- Low-tech
- Expensive

# What Do We Bring to the Table?

Picky is:

- Quick
- Efficient
- Easy to use

# Let's Pretend You Have a Parking Spot

# You have the option to :

- drive away
- waiting 5 minutes and earn ?

## What option do you choose?

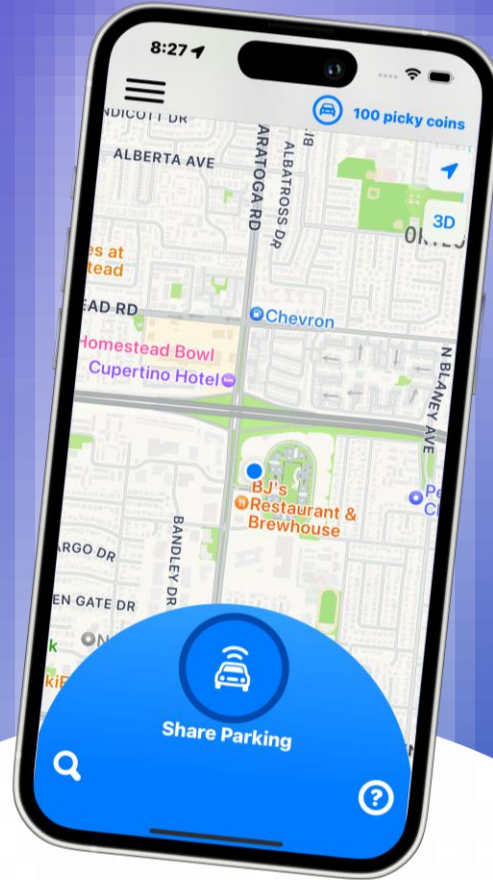

**So... it Depends Right?**

**But What if I Told You,  
in your next park  
you will have parking right away,  
would you still consider ?**

# So That's the Power of Picky

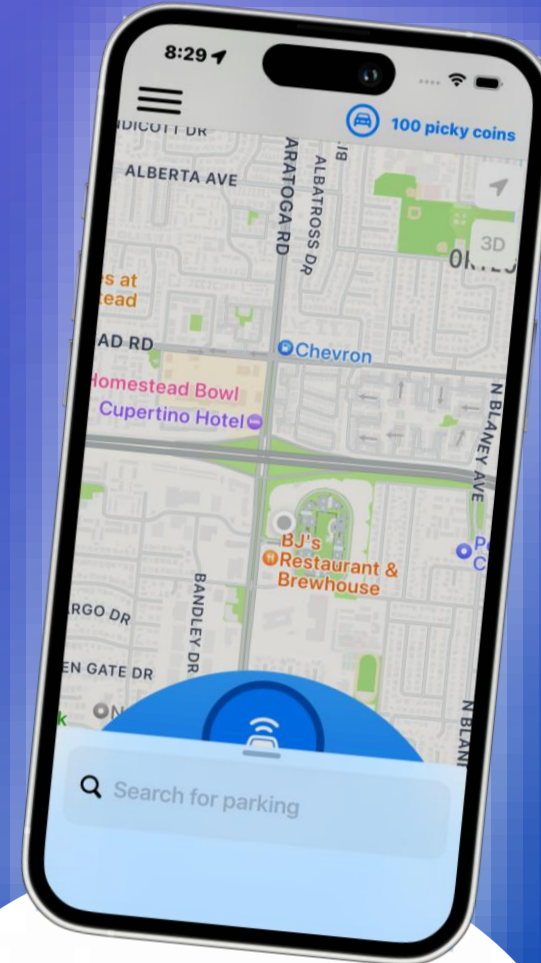

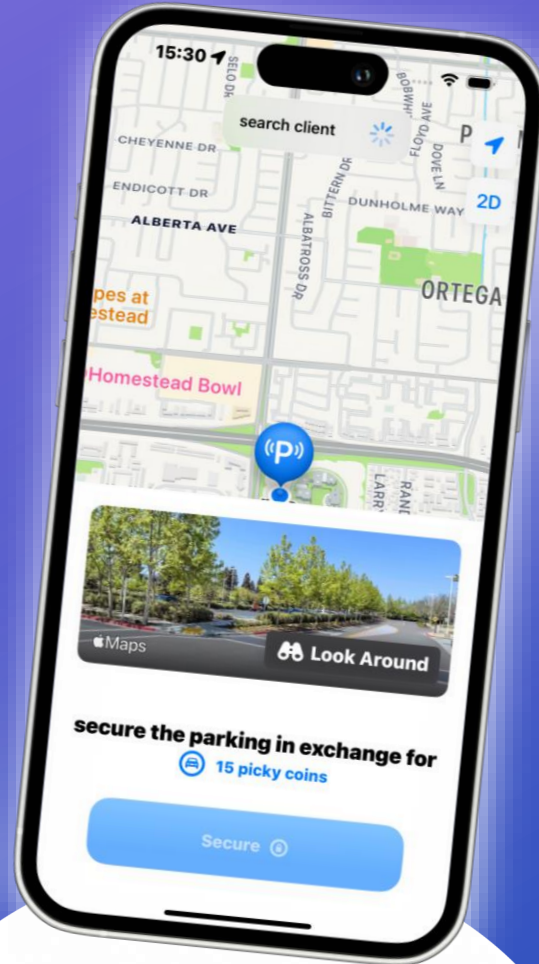

# Share Parking

- We made sharing parking as easy as possible.  
You can see real-time availability, including a satellite preview of the location.

# Search for Available Parkings in Real-time

# Reserve Parking

- Real-time navigation process until you arrive at the parking spot location
- After successfully parking, simply press the “Parked” button to end the process

# Our Sign Flow

- We support multiple languages
- And have user-friendly OTP sign flow

# That Was Picky 2.0

# Introducing Picky 3.0

## That's a different story

Picky AI

We Predict Your Next Parking Spot

# RNN Neural Language Model

## RNN – recurrent neural network

“is a deep learning model that is trained to process and convert a sequential data input into a specific sequential data output. Sequential data is data—such as words, sentences, or time-series data—where sequential components interrelate based on complex”

**The Picky RNN model is built to predict user information even if the app is terminated.**

# Messages Using The Picky AI Model

- We send the users push notifications about available parkings that fit their lifestyle when they are troubleshooting finding a place to park.

# We Also Added

# Schedule Parkings

- Schedule the time you plan to leave the parking and from
- You can view the parking statuses with colors ranging from green for available parking, red for reserved parking and gray for parkings shared in the app within the last 1 hour

# Custom Navigation

- Utilize third-party navigation options such as Waze, Apple Maps etc.
- Experience a custom Picky car simulation with real-time movement, mimicking a real car driving on the road.

# In-App Purchases

- Purchase coins directly through your phone wallet and utilize them to reserve parkings.

# Why We better?

- End to End Service
- Don't Worry About Your Park
- Learn The User And His Actions
- We Use AI To Relevant Our Service (Under Construction)

**Thank you for Your Time**  
**Any Questions?**
